

Reliable Fixation of  
GTR/GBR Membranes

# Ti-System

1

## Reliable Stability

- Safe, fast and simple fixation of resorbable and non-resorbable membranes<sup>1</sup>
- Effective immobilization of membrane and bone graft particulates for undisturbed healing<sup>2</sup>

2

## Titanium Tacks<sup>1</sup>

- Hex connection for secure pick up and stable transportation to the surgical site
- Made of Titanium Grade 5
- Available in 3 mm length in pack of 5 units

3

## Innovative Tack Design "Nail In – Screw Out"

- Threaded design for rigid fixation and retention
- Easy to remove with the hex screw driver<sup>1</sup>

4

## Autoclavable Tray

- Space for 15 titanium tacks
- Easy to open thanks to one-hand mechanism
- For machine cleaning and sterilization<sup>1</sup>

1. Ti-System IFU latest revision. November 1st 2014

2. Fugazzotto PA, Implant and regenerative therapy in dentistry: a guide to decision making. 2009: John Wiley & Sons.

# Ti-System

## How It Works

1  
Sterilization of all components prior to use.

2  
Pick the tack from the tray using the application device and place it in-situ using a mallet.

3  
At the day of re-entry use the hex screw driver to loosen the tack and remove it with sterile tweezers.

## Typically Used For

**Fig. A** Lateral Sinus lift procedures to fix CopiOs® Pericardium Membrane.

**Fig. B** Horizontal ridge augmentations to stabilize bone graft and CopiOs Pericardium Membrane.

**Fig. C** Vertical grafting procedures to fix Titanium reinforced OsseoGuard® PTFE Membrane.
