Stackable Guides Solutions

implant concierge® | ZimVie

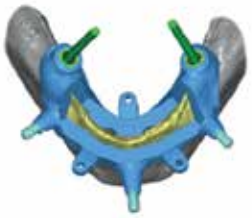
Stackable Guides Solutions

Implant Concierge offers stackable guides which are designed to provide safer support in advanced clinical situations. These guides allow performing multiple functions in a single device.

A Bone Reduction Guide Package is a bone supported stackable guide which allows for resection, implant insertion, and provisional positioning.[1]

1. **Delivery Guide** (dental reference) part can be tooth supported. This will go over existing dentition to provide orientation.

   Note: Each individual case will be evaluated to assess the possibility to add this step.



2. **Bone Supported Base Guide** to perform bone reduction surgery:[2]
   - Anchor pin positioning
   - Resection plane
   - Dental reference (when available)[3]
   - Base connector housings

3. **Implant Surgical Guide**[4]

Note: Please refer to the Bone Reduction Guide Step-by-Step for more detailed information and instructions.

Add-On Services

Provisional Design

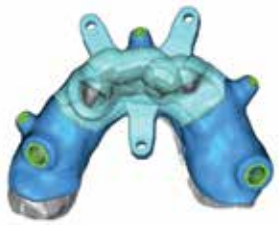
- **Wax-Up Design Service:** Wax-up design for prosthetically driven implant placement.
- **Provisional Design:** The provisional design including the male connector is provided in .STL format to print in-house or at a local laboratory.

Note: Only available if Wax-Up has already been completed by Implant Concierge or your local laboratory.

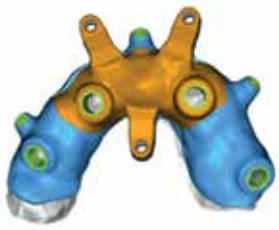
Tissue Post-Extraction Guide Package is a tissue/tooth supported stackable guide which allows for extraction and immediate implant placement, and provisional positioning.[1]

1. **Delivery Guide** (dental reference) part can be tooth supported. This will go over existing dentition to provide orientation.

   Note: Each individual clinical case will be evaluated for specific needs.



2. **Tissue/Tooth Supported Base Guide:**
   - Anchor pin positioning
   - Dental reference[3]
   - Base connector housings



3. **Implant Surgical Guide**[4]

   Note: Please refer to the Tissue Post-Extraction Step-by-Step for more detailed information and instructions.

Premium Connectors

Implant Concierge offers the possibility to upgrade the connectors to our stackable guide solutions.

Note: Each individual case may be evaluated with your case coordinator to identify if these connectors are the most suitable option for your guide.

[1]Provisional positioning not included in the Stackable Guide Packages. If provisional design is requested, additional information (ie. occlusion scan, post-operative prosthetic situation stl., etc.) will be required, and it is necessary to provide the files in the same relative reference system. [2]Prior to this step a flap will need to be raised. [3]Remove the dental reference part once orientation is verified and the guide is pinned to the bone, and extract teeth if indicated. [4]In some scenarios, the Base Guide could also be used as the implant surgical guide.
